

DUAL 8" BBQ Roof Cap

Designed for high-performance outdoor ventilation, the Proline Dual BBQ Roof Cap terminates two separate duct runs through a single roof penetration without merging airflow. Each duct maintains an independent path to the outdoors, helping reduce restriction while providing a clean, weather-resistant termination for high-CFM BBQ ventilation systems.

Each connection accommodates either 8" or 10" rigid duct, making the cap ideal for Proline BBQ Wall Canopy and Island hoods as well as other dual-duct ventilation systems. Integrated backdraft dampers, bird and debris screening, perimeter flashing, and weather-resistant PAC-CLAD steel construction provide a complete roof termination designed for demanding outdoor applications.

Dimensions

Dimensions 23.125" W x 11.5" D x 10" H
Flange 28" W x 25.5" D

Specifications

Duct Size Per Outlet 8 or 10" Round Rigid
Application: Outdoor BBQ Range Hoods
Material PAC-CLAD Powder-Coated Steel
Damper Internal
Included. Roof Cap and Inline Dampers

Warranty 3-Year Limited Warranty
